

The Ultimate Hack for Your IKEA Cabinets

“IKEA is second to none when it comes to creating high-quality kitchen modules at very reasonable prices,” say Jeppe Christensen and Michael Andersen, founders of Danish brand Reform. It has specialized in customizing the Swedish retailer’s off-the-shelf kitchens with upscale cabinetry since the pair spotted a gap in the market for affordable custom solutions.

They set about collaborating with internationally acclaimed architects, such as BIG, Henning Larsen, and Norm, to bring great design to the masses. “For many people, the heart of the home is the kitchen,” says Christensen, “but this is a room that’s often overlooked ... with design as an afterthought. Reform wants to change this.”

Once you have acquired your IKEA cabinets, all you need to do is select fronts and countertops from Reform’s architect-designed range to customize your space. From timeless options, like the 1960s-inspired Basis model, to Norm’s dramatic smoked oak range, there is a wealth of contemporary designs to choose from.
