

Ecuador—

Land of volcanoes

Cotopaxi
Day 104
10,209 miles

After a brief stop in Quito, waiting for parts and meeting friends, we're back on the road. We can feel the change in altitude as we climb back up to 9,000 feet. Ecuador is one of the smallest countries along the west coast of South America, but it is home to 27 volcanoes and some of the highest mountain peaks in the world.
