

INDIAN CREEK

in a Nutshell

CLIMBING TYPE

Trad

PROTECTION

Trad rack

SEASON

Spring, fall, and winter (can be very snowy and cold!)

WHERE TO STAY

Camp in the area's campgrounds for a small fee

ONE MORE THING

The sandstone is very fragile, so do not climb when it is wet. After rain or snow, wait at least 24 hours to climb and make sure the rock is completely dry. A good guideline to follow is this: "Mud on your feet? Retreat! Shoes dry? Go try!"

USA

Reservoir Wall

Scarface

Way Rambo

Supercrack Buttress

Pistol Whipped
