

THE PURSUITS OF HAPPINESS

Quirky and tactile, the cannabis accessories from The Pursuits of Happiness draw inspiration from the oddities of the natural world. The aim is to introduce a little art into the experience of relaxing with cannabis. The simple designs speak for themselves. The Aero is a revamped smokers' staple, described as "basic as air, and arguably nearly as vital." Cast in stoneware and finished in a matte glaze, the shell-like Del Mar fits snugly in the palm of the hand and evokes the kind of relaxation that can only be found by lying on the warm sands of a remote beach. *
