

QUILL

Oozing style and sophistication, the Quill is an all-in-one vaporizer pen in recyclable stainless steel filled with 750 milligrams of pure full-spectrum cannabis extract. This clever gadget works as a microdosing tool that allows the user to build the level of intensity—with around 2 milligrams of active cannabinoids in each puff. Describing its products as “sippable weed,” Quill ensures that each pen contains a single-source strain, and provides wine-style tasting notes for its range of classic and modern strains. *
